

XM is an alternative to the free radio stations in my area yes.....,however XM is an alternative I have chosen to install in my vehicle, and then pay for every month. I do not wish to have the FCC nor the NAB dictate what I can or cannot hear. The FCC should stick to its original job of regulating transmitter strength and frequency not content. I respectfully ask you to reject petition 04-160 from the NAB.Sincerely,
Thomas Petrilli
